

SkillsTech Australia Corporate DVD Script

SkillsTech Australia is a lead TAFE institute and the largest public provider of trade and technician training in Queensland and Australia.

The development and delivery of training for key industries covers: automotive, building and construction, electrical and electronics, manufacturing and engineering, and sustainable technologies.

SkillsTech Australia delivers training to people of all ages – from school students through to mature age students.

We provide over one hundred and twenty training programs including school-based programs, pre and post apprenticeship training, diplomas, advanced diplomas, licensing and, of course, traineeships and apprenticeships.

SkillsTech Australia delivers trade and technician training at ten centres across Brisbane. A new major training centre is being developed on Brisbane's north side.

The Queensland Government is investing \$181 million dollars in SkillsTech Australia's main Brisbane training centre at Acacia Ridge, now in stage two of development. The training centre features state of the art equipment, and includes a new foundry and Sustainability Innovation Centre.

The Sustainability Innovation Centre will showcase green trade skills, focusing on in energy and water conservation.

Our renewable energy program is training electricians in solar panel installation.

All new SkillsTech Australia facilities meet environmental standards in design and operation.

SkillsTech Australia teachers deliver world class teaching to over twenty thousand students annually.

One of our teachers recently won the award for national Teacher of the Year.

SkillsTech Australia is taking trade and technician training into the future with blended learning - a mix of face to face teaching, workplace-based learning, video conferencing and e-learning.

Training is offered throughout the year to meet industry needs.

SkillsTech Australia is industry's right hand

Super: SkillsTech Australia: Industry's right hand.
